

To Whom It May Concern:

I am writing this letter to recommend Ayushman Puri, a Grade 12 student at Overseas Family School, Singapore, who interned at BluMaiden Biosciences from July to August 2024 under my supervision.

BluMaiden Biosciences is a Drug Discovery and Development organization that focuses on harnessing the human microbiome, using advanced AI-powered computational genetics and chemistry platforms to explore new frontiers in medicine.

I have had the pleasure of working with Ayushman over the past four months, during which he interned with us to gain insights into the nuances of drug development and its associated challenges. He actively explored how emerging tools and technologies, such as precision medicine and AI, can be used to address gaps in the field.

Ayushman is an exceptional individual, displaying both intellectual and emotional maturity that is rare for someone his age. He has a keen interest in learning and exploring biomedical sciences. His focus and dedication were evident in his work, and he collaborated effectively with me to deepen his understanding of the subject matter in the most efficient and intellectually stimulating way.

Under my guidance, Ayushman authored a review article titled "*Drug Development in the Era of Artificial Intelligence*" which is submitted for publication in the *Journal of Student Research*. The paper examines the transformative potential of AI in the drug discovery process, including expediting drug target identification, predicting drug efficacy, and reducing the cost and time of bringing new treatments to market.

Given his strong analytical skills, passion for human health, and enthusiasm for learning, Ayushman is no doubt an excellent candidate for further studies in Biomedical Engineering or related fields.

It was a pleasure to mentor Ayushman, and I am confident he will excel in his future endeavors. I wholeheartedly wish him the best of luck in his academic and professional journey.

Sincerely,  
Peng ZHAO, Ph.D.
