

I am writing to recommend Ayushman Puri for his Public Awareness initiative on Antimicrobial Resistance (AMR)

I have had the opportunity to Guide Ayushman on this initiative. He expressed his desire to understand the global issue of AMR and what we can do as a society to delay / prevent it.

Ayushman has shown a strong understanding of the topic of global importance and demonstrated ability to critically analyse trends and address the dangers posed by AMR. He had a strong desire to spread awareness on this issue and influence the community positively

The presentation that Ayushman delivered to the audience of high schoolers, young students and residents, is not only timely but also crucial, given the growing concerns around antibiotic overuse and resistant pathogens.

Ayushman is an articulate, confident, and well-prepared speaker, and his presentation was both engaging and informative for the audience. It reflected thoroughness and depth of his understanding.

I wish him best for his academic career and his preferred course of Biomedical Engineering.
